

Structural bonding – Class-winner in all disciplines.

Structural adhesives offer significant advantages compared to traditional fastening methods. Find more on www.360bonding.com

Structural bonding has become an integral part in today's industrial production processes. Whether in engineering, white goods, the marine industry or renewable energies, adhesives are increasingly used to replace traditional fastening methods such as riveting or welding.

Structural adhesives increase the durability and reliability and therefore also the sustainability of products all around us, virtually 360°. This creates previously unexpected possibilities.

Requirement	Industrial fasteners*, staples, tacks	Welding, soldering, brazing	Structural Bonding
Join materials	✓	✓	✓
Join heat-sensitive materials	✓		✓
Join different materials	✓		✓
Even transfer of forces		(✓)	✓
Join thin materials		(✓)	✓
Reduce volume & weight		(✓)	✓
No damage to material structure			✓
Reduce vibration and tension			✓
Sealing of joints		✓	✓
Avoid galvanic corrosion			✓
Allow improved aesthetics			✓

* nailing, screwing, riveting

All you have to do is ask!

If you require additional information or advice – get in contact with us.

Henkel has the technical staff trained to provide on-site design and engineering support, application testing, validation and integration of dispensing and curing equipment.

In addition to this structural bonding core range, Henkel offers a variety of other structural adhesives to match ~~also~~ very specific needs.

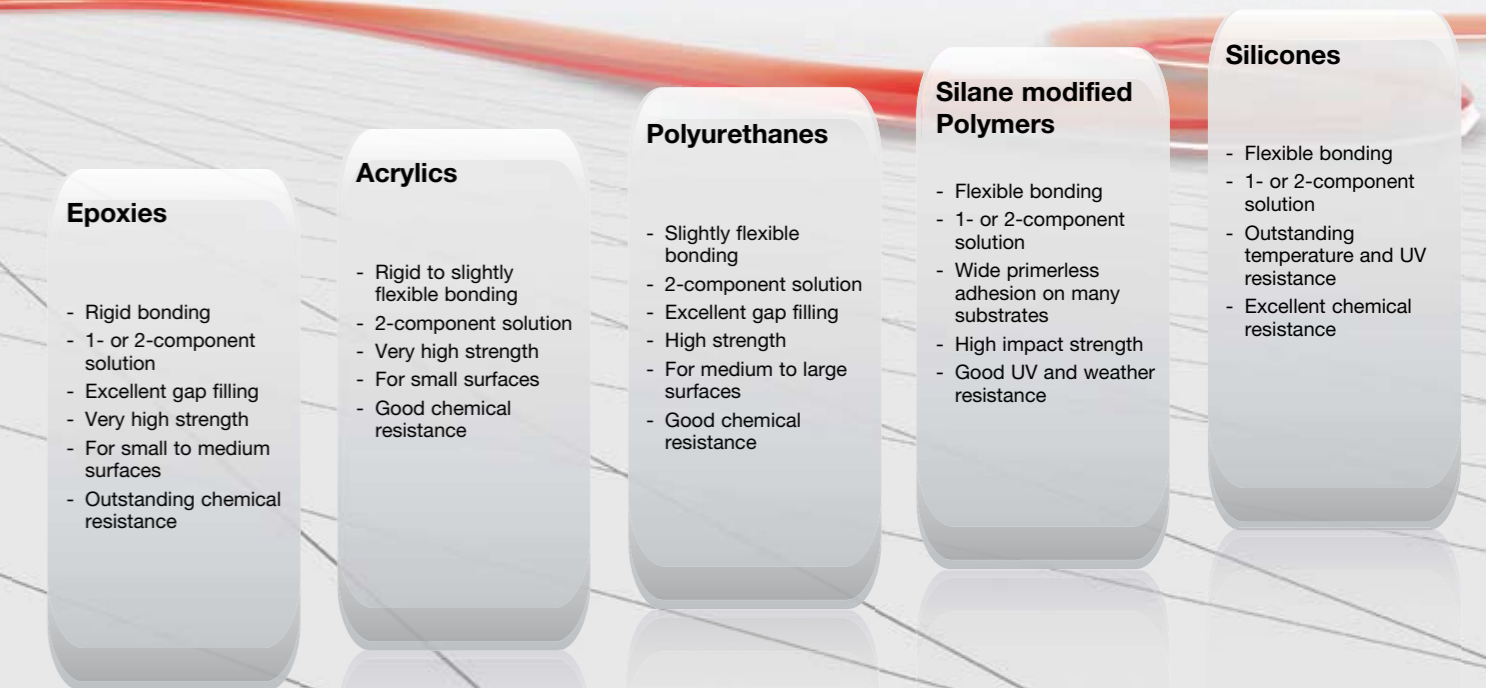

www.360bonding.com

One reliable partner, five technologies – unexpected possibilities.

Our entire expertise and product range for structural bonding provides suitable solutions for every application – or in short **360° bonding**.

Regardless of what you need to bond and whatever conditions you face, if it's technically possible, we can provide you with the right solution. Our comprehensive range of structural adhesives gives you access to five core adhesive technologies. This means that we are able to provide you with the best solution for almost every application and every combination of substrates.

We also offer dispensing equipment ranging from simple hand-held devices to fully automated systems, specially designed to make the application of our products economical, easy, fast, precise and clean.

Henkel – Together we empower your business.

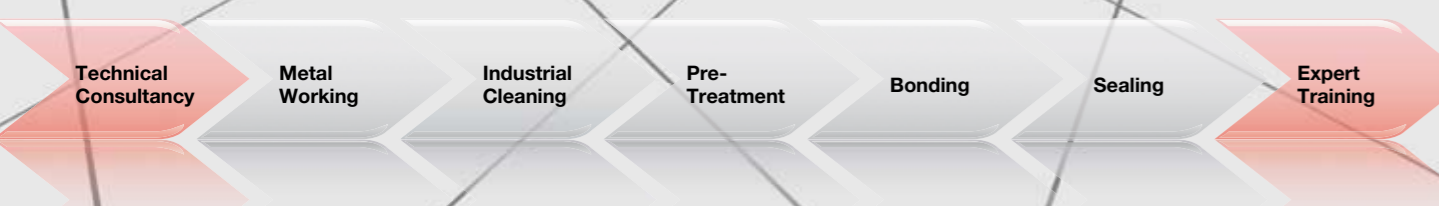

Get access to our comprehensive adhesive, sealant and surface treatment business and benefit from our expertise.

The General Industry Business fulfills specific industry and maintenance needs from a single source.

Benefits of working with Henkel

- State-of-the-art technologies and sustainable products
- Globally trusted brands, known and proven for high reliability – such as Loctite® and Teroson
- Advanced training tailored to your specific needs
- Experienced sales and technical engineers across Europe
- Products and services covering the full industrial value chain
